

WERRIBEE OLDER ADULT BIRD WATCHERS
SEPTEMBER 13TH OUTING

We have the use of the Community Bus on Friday. 13rd September. It was suggested that we go to Stoney Creek in the Brisbane Ranges.

We will leave from Watton Street, near Chirnside Park at 8-30 am.
Bring your own lunch and thermos.

The Bus can accommodate 18 people so do let Shirley know if you are going to come. This will probably be a popular trip so indicate your intentions early.

There is no cost for the bus.

It is anticipated the bus will be back in Werribee at about 4-00pm.

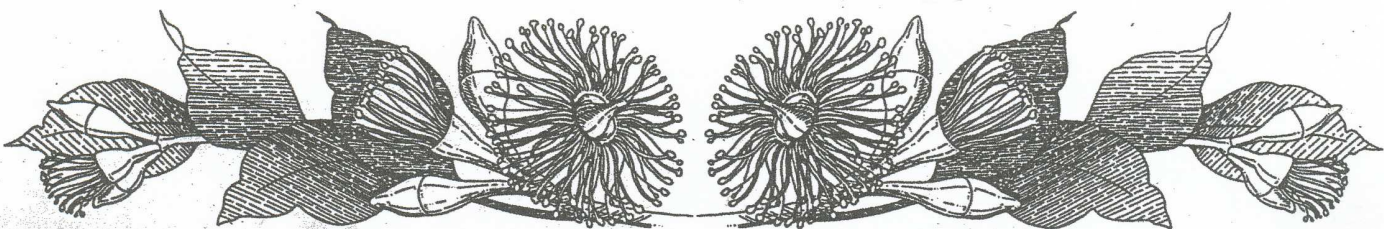

According to the Department of Conservation "If you move quietly in this area you may see **blue wrens, honeyeaters, tree creepers, Mistletoe-birds, fly-catchers, yellow robins, parrots** and others. A more comprehensive list will be available.

The trip to Point Lillias was very windy but we saw about 40 birds and had a very enjoyable day.

If anyone would be interested in doing a reconnoitre of the area please let Shirley know.

We/ I wish to come on the Friday September 13th trip to Brisbane Ranges.

Return before Sept. 2nd. Thank You.
